CHAPTER 26

freightChainsFromTravelDiaries

Kai Nagel

Entry point to documentation:

`http://matsim.org/extensions` → freightChainsFromTravelDiaries

Invoking the module:

Currently not possible.

Selected publications:

Schneider (2011)

Sebastian Schneider has done a Ph.D. dissertation about generating freight vehicle chains by essentially re-sampling the information contained in the German survey KiD (Kraftfahrzeugverkehr in Deutschland) (Steinmeyer and Wagner, 2005). Since the KiD is essentially an activity-based travel diary, the method should also be applicable to other situations. Since Sebastian has left science for the time being, he allowed us to take his code and integrate it into the repository, under the GPL (GNU General Public License). For the time being, it will just "sit" here until someone attempts to make it work.
